

COMMANDCENTRAL ANALYTICS

UNCOVER MORE ACTIONABLE INSIGHTS

CommandCentral Analytics is a powerful cloud-based investigative analytic platform. It gives you instant access to visually insightful data from across local, nationwide and 10,000 public sources all in an easy to use interface. Quickly identify emerging crime trends, track down leads with more accuracy and effortlessly communicate intelligence across your agency — empowering everyone to fight crime smarter with CommandCentral Analytics.

BUILT TO LEVERAGE MORE DATA

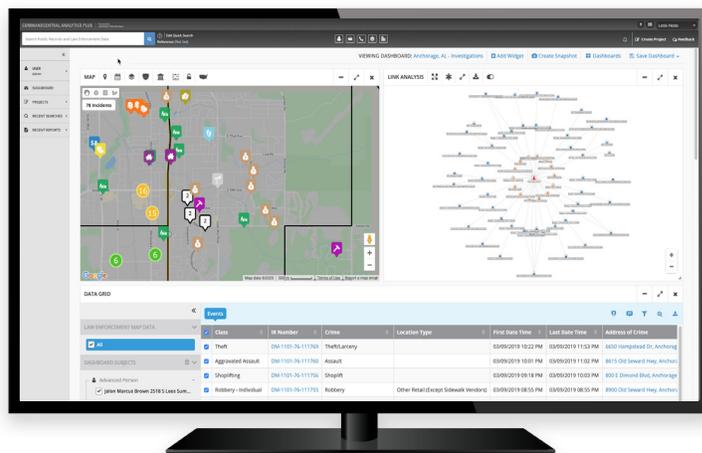

- Works with any CAD or RMS systems regardless of vendor.
- Spot emerging crime patterns and trends within and beyond your jurisdiction using over 298 million interjurisdictional records.
- Access billions of public records from over 10,000 sources to further aid your investigations (CommandCentral Analytics Plus only).

CONFIGURABLE FOR ANY ROLE

Command Staff can make better informed decisions.
Detectives can quickly uncover hidden connections.
Analysts can create and share deeper crime studies.
Officers can patrol more effectively.

DELIVERED AS-A-SERVICE

Cloud based software as a service (SaaS) is cost effective, secure and reliable. New features and capabilities are introduced seamlessly, without down-time or interruptions.

CommandCentral Analytics Plus Dashboard with Link Analysis

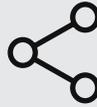

THE NEXT GENERATION INVESTIGATIVE ANALYTIC PLATFORM

ELEVATE DATA DRIVEN POLICING

PROACTIVELY ADDRESS CRIME

Visualize data to identify crime patterns then deep-dive into it to understand why it's occurring.

IMPROVE DATA SHARING AND COLLABORATION

AMPLIFY YOUR AGENCY'S IMPACT

Effectively communicate insights and develop initiatives to combat crime.

MORE EASILY TRACK DOWN LEADS

SPEED UP INVESTIGATIONS

Quickly and easily find suspects, connect data points and make arrests.

ELEVATE DATA-DRIVEN POLICING

Robust Analytic Visualizations: Intuitively present data across dashboards with various graphical widgets and maps to help users quickly and easily interpret vast amounts of data.

Advanced Filtering and Reporting: Simple, yet extensive controls for defining data parameters allow your users to hone in on the data they want to examine.

Dashboards with Depth: Explore incidents directly within a dashboard without switching applications to see the details of the underlying crime.

Public Safety Data Exchange (PSDX): Access 298 million records from agencies across the country to help users build a complete picture of individuals, locations, and incidents.

IMPROVE DATA SHARING AND COLLABORATION

Reporting and Data Download: Quickly create print-ready reports of crime and entities. Users can easily schedule the delivery of reports to any stakeholder. They can also be downloaded in a wide variety of formats.

Easy Dashboard Sharing: Effortlessly share and communicate dashboards between users to ensure everyone has the same insights to take action.

MORE EASILY TRACK DOWN LEADS

Advanced Search with Trusted Results: Quickly find information on people, vehicles, and phone numbers with 99.9% accuracy so that raw, mass information can become the intelligence you need to fuel your investigations. With CommandCentral Analytics Plus, users can also search businesses and virtual identities.

Link Analysis: Identify non-obvious connections between entities to develop a comprehensive understanding of them. For deeper insights into complex relationships, CommandCentral Analytics Plus integrates public records directly into the link analysis tool.

Accurint® for Law Enforcement: CommandCentral Analytics Plus users receive an enterprise wide license to Accurint for Law Enforcement, giving more detailed public record searches for your entire agency.

CHOOSE AN OFFER THAT'S RIGHT FOR YOUR AGENCY

CommandCentral Analytics has two subscription offers to fit your agency's needs and budget. Both provide agencies with a powerful investigative and reporting platform. CommandCentral Analytics Plus adds integrated public records search and includes an enterprise wide license to Accurint for Law Enforcement for deeper insights.
