

# USE CASE SECURE AREA MONITORING

Safe Hospitality

## Operational View

### DETECT

#### ACCESS CONTROL BREACH RECOGNIZED

Security teams receive an alert of a door breach in a secure area directly on the device of their choice and in the command center.

### ANALYZE

#### SITUATIONAL AWARENESS GATHERED

Relevant cameras are populated and the intruder is tracked throughout the facility and location of closest resources is determined.

### COMMUNICATE

#### RELEVANT PERSONNEL ENGAGED

An image of the intruder is distributed to security teams and the path of the intruder is continuously updated to assist in interception.

### RESPOND

#### INCIDENT CONTAINED AND REPORTED

Security teams confront the intruder and escort them off the premises. An incident is logged with pre-populated fields and all relevant data.
